CARBON X

C A R B O N X

The **Carbon X** is the answer. While other systems can be restrictive in its ability to only scan similar sized objects, the Polyga Carbon X is different.

The Carbon X combines the ability to scan objects of different shapes and sizes, blue light technology, sturdy rugged body, and powerful software for high-precision professional results.
MORE POWERFUL PROJECTOR

Capture more precise and accurate shapes and intricate details with the new more powerful brighter next generation high lumen projector.

5 MEGAPIXEL CAMERAS

Improved 5 megapixel dual cameras for capturing surfaces in exceptional detail with photo texture support.

FLEXIBLE FOV SCANNING

The Carbon X has a adjustable slider mount to create a custom field of view ranging from 290mm - 1220mm.

BLUE LIGHT TECHNOLOGY

Blue light has a shorter wavelength which capture finer details with less ambient color noise. Blue light also is longer lasting and safer with a cooler operating temperature.
FASTER CAPTURE

Blue light technology can scan objects in a fraction of the time it takes other scanning methods.

PROFESSIONAL GRADE

High grade steel body construction with anodized black textured coating for high durability and years of use.
TARGET LESS SCANNING

No need for endless preparation and removal of scan targets. Effortlessly setup, calibrate and shoot.

PHOTOGRAMMETRY READY

Capture large scale objects and areas with optional photogrammtery kit.

3D PRINTER READY

Easily creating 3D printing ready models by exporting in STL format.

SMART DATA PROCESSING

Process data fast in 3D3, ASC, OBJ, PLY, STL, FBX.

COLOR KIT COMPATIBLE

Optional color kit with color camera for capturing RGB in high detail.
