PROFESSIONAL SUMMARY

Marketing Operations Manager experienced building inbound demand generation, CRM workflows, lead qualification, and pipeline systems across technical, industrial, automotive finance, and SaaS environments. Hands-on experience improving customer acquisition workflows, lead routing, lifecycle coordination, and conversion systems that support sales-ready pipeline generation. Background supporting inbound marketing, operational workflows, and commercialization initiatives for technical products and high-consideration buying environments.

KEY ACHIEVEMENTS

- Generated 300+ qualified inbound leads per month through CRM workflows, lead routing, and inbound qualification systems.
- Reduced customer acquisition costs through improved targeting, lead handling, and conversion workflows.
- Improved speed-to-lead from minutes to ~30 seconds through real-time CRM routing and follow-up automation.
- Reduced lost opportunities by improving lead qualification, routing, and follow-up coordination processes.
- Supported inbound customer acquisition initiatives across industrial technology, automotive finance, and technical product environments.
